

The fact that the High Court has deemed this legislation to be unconstitutional speaks volumes about the political intentions this bill aims to facilitate.

As a taxpayer, I do not condone the government using my taxes to pay for the development of this bill. As a father and citizen, I do not want the kind of society that this bill will move us towards. As the son of man who fought for this country in WWII, I am appalled that his sacrifice to protect our democracy is held in such flagrant disregard by this government.
