Subject: HPE CM: Workplace protection bill 2022

Unfortunately I'm one day late....so hopefully you still receive this....

The workplace protection bill 2022...don't belong in Tasmania...they belong in China.
I've all for safety for work places...but this is a total sham by the likes of Guy Barnett and co.
Radical extremists....he says...No
... it's the average Tasmanian being able to demonstrate/protest on any issue without fines and jail sentence..What this really is about is allowing Forestry Tasmania...I won't mention the S.word....to continue to log old growth forests and allow Chinese.owned mines...to decimate the Tarkine.....and fine/jail anyone who gets in the way.This garbage has been going on in Tasmania for decades....Gunns etc....and is a total blight on the so call....clean green image of Tasmania...When is the liberal government ever going stop this pathetic nonsense and move on ...and stop living in the past...
.
